

This is Emily Hilson, who is keep missing first few minutes of her class because the walk from her dorm to class is kinda long and she wakes up late so that makers her more late. In short time she time management problem so that is why she is facing above mention problems.

Today is the 4th day of her class and unfortunately she missed first few minutes of class again! Now she is really concerned because this can affect on her exams, homeworks, etc...

Now she thinks since google has all the answers to the questions, so why not look it some helpful tips.

Now she is on her computer searching for some tips and she finds something else that she was not expecting. She found an app call class tracker/daily life tracker. She downloads it.

The purpose of this app is to remind her based on what time she prefers to wake up, go to bed, study etc.. so it depends on how long she takes to walk to the class for example: she usually takes 10 minutes to get to the class then this app will remind her before before 15 minutes, so in case if she gets stuck in traffic she won't be late to class. Basically this app will make plans for you, once you have entered all your preferences. And now you don't have to worry about time management anymore!

The very next day she uses this app and she thinks it's worth downloading. So she recommends this app to her family, friends, classmates, etc...

Meet L.M Mcgee. He is notorious for procrastinating and forgetting about assignments.

In class he realizes that he forgot about the weekend assignment and now has to take a zero for the assignment

After spending hours on youtube, He listens to an ad.  
The ad is about this app that can put your school life in  
an easy to use schedule so you never have to worry  
about missing an assignment. The app i called Class  
Tracker

After some thought, Mcgee decided to give it a shot and downloaded it.

In a short amount of time, he had his clases logged into the app and had all upcoming assignment at the tip of his fingers.

After downloading the app, L.M Mcgee started getting head of time as well as going to class prepared.

With Class Tracker, it became easier to manage time and his grades saw improvement.

Timmy, a freshman at UofSC, is getting ready to wake up in a few minutes to go to class. The problem is that he will not have his parents to tell him. Timmy also doesn't know how to get to class or what time he will reach. So timmy will have a hard time trying to get used to college life.

Timmy calls his friend bob to ask him how he is getting used to college. And Bob said that he was using the class tracker app to make college life easier.

Timmy takes bob's suggestion and goes to the app store and gets the class tracker app.

Timmy tries the app and sets up his schedules, timings, and alarms.

Timmy gets ready for class and starts heading out his dorm. He typed all of his schedule; so now the app tells him how long it will take him and the easiest route

Using the Class Tracker app, Timmy arrives to the russell house 10 minutes early. And not only that, timmy got enough sleep because the app wakes him up in time.

This is Mark Jones. His goals are to graduate college and explore the world. He is a full time college student in wichita,kansas.

Mark always dreaming of getting a college education but now that he is here mark realizes that college is a lot harder than high school.

Although Mark has a lot of ambition he has poor time management and is either late to class or misses class entirely. Mark also gets stuck in traffic because he leaves at rush hour.

One day Mark is scrolling through the app store and comes across our class tracker app and downloads it. This app has the solution to his poor time management problem.

This app helps mark stay on time and reminds him when his classes start and end. This app also keeps track of traffic so mark will no longer get stuck in traffic. Another feature is that mark can put his assignments and the due date then the app will remind mark to do the assignment correlating to the due date.

Ever since mark downloaded this class tracker app. He is now arriving to class on time and ready to learn. Mark is never late to class and he gets his assignments submitted on time. If you are struggling with the same problems as mark try the class tracker app today!
